# HOW TO USE

## Epiduo® Forte (adapalene and benzoyl peroxide) Gel 0.3%/2.5%

Epiduo Forte Gel is a once-a-day treatment that can be used at any time, day or night. Making it part of your daily routine may help you remember to use it. Epiduo Forte Gel was designed to be used every day for best results. Be sure to follow all of your healthcare provider's instructions.

### JUST FOLLOW THESE 3 IMPORTANT STEPS

STEP  
1

#### CLEANSE

- Wash your face with a gentle, non-soap cleanser like Cetaphil® **DERMACONTROL™** Foam Wash or a wash recommended by your doctor. Pat dry with a soft towel, but don't rub

STEP  
2

#### TREAT WITH EPIDUO FORTE GEL

- Spread a pea-sized amount evenly across each affected area(s) of your face. Avoid your eyes and lips and other areas of your face where skin is thin like the inside of your nose
- Wash your hands after you apply the medicine. Wait for gel to dry completely before dressing
- Do not use more Epiduo Forte Gel than you need to cover the affected areas. Using a large amount of Epiduo Forte Gel won't speed up your results and could actually bother your skin

STEP  
3

#### PROTECT & MOISTURIZE

- Apply a gentle moisturizer during the day, preferably one with SPF protection, like Cetaphil® **DERMACONTROL™** Moisturizer SPF 30
